

RANDOM BIRTHPLACE GENERATION

These simple tables can be used to randomly generate the birthplace of a Chéler character born in the Kingdom of Chélemby: the first table will be used to determine the antánalâr (district) of birth, and the second to establish the actual nâlard (clan holding, or freehold), or the major city in which the character is born.

The percentages of the tables have been allocated trying to take into account the population of each district and the population of the three major cities (Chelemby City, Evánekin, and Kolâdis) as provided in *THE KINGDOM OF CHÉLEMBY* module (version 1.0. © 1991, 2005 N. Robin Crossby, Keléstia Productions Ltd. – all rights reserved).

It would be appropriate to use these tables together with the Chélemby Occupation Table (© 2012 Keléstia Productions Ltd. – all rights reserved): in this way you can make use of the percentages provided under Chéler % Urban and determine if, on the basis of the parent occupation, the character is actually born in a major settlement (the one that gives the name to its nâlard, or one of the major cities), or if s/he comes from a nearby minor settlement.

The Chéler Class on the Chélemby Occupation Table will establish also if the character belongs to one of the leading Chéler tia-nalâri clans: in this way, if you have a copy of *THE KINGDOM OF CHÉLEMBY* module, you could also properly trace the tia-nalâri clan of the character, if it is allowed by her/his social class (in fact, each nâlard is bonded to a clan).

The Chélemby Occupation Table is freely downloadable on the Keléstia Productions Ltd. [website](#), and on the same site you can purchase *THE KINGDOM OF CHÉLEMBY* module.
