

*KELESTIA PRODUCTIONS IS EXTRAORDINARILY PLEASED AND  
PROUD TO ANNOUNCE A BRAND NEW:*

# MAP OF THE HÂRNIC ISLES

© 2008 KELESTIA PRODUCTIONS  
CARTOGRAPHY BY N. ROBIN CROSSBY.

A brand new, and definitive version of one of the best-loved fantasy maps ever made, available in both printed and interactive multi-layered PDF file formats.

All new vegetation and relief makes geographical features clearer than ever before. This is the most detailed map of Hârn ever made.

Complete replication of all geographical & settlement features from N. Robin Crossby's 1983 Hârn Map, with many additional features identified. There are more than 500 geographical and settlement features on this map.

The hex grid has been omitted from the printed version to conserve the map's physical beauty. This is one of the most 'artful' fantasy maps ever published. It looks more like a satellite photo than a topographic map, yet has all the detail of the original 1983 map (and much more).

The printed version is produced using a 'green' printer, on heavy stock, and shipped unfolded in a durable mailing tube. It is suitable for hanging on the wall with or without framing.

The interactive PDF version includes details of political boundaries, areas of core and peripheral control by the various realms, the ranges of human and gârgún tribal groups, details of major and minor trade goods and trade routes, and enables the user to zoom into very high levels of detail.

Available in printed and interactive PDF formats from  
[www.kelestia.com](http://www.kelestia.com).

*A truly spectacular work of cartographic art.*

MINIATURE OF THE MAP

The printed sheet is 22 x 34 inches.

Map field is 75 x 50 centimetres + Legend etc.

Scale: 5 cm : 100 km.

Area shown = 1,500,000 km<sup>2</sup> (93,750 Hârn Square Leagues).

An extra column of grid squares added on the western edge of the map to an correct error in original 1983 map. There are now 15 x 10 grid squares.

(APPROXIMATE) SCALE DETAIL (LOW RESOLUTION)
